

Addressing risk factors with evidence-backed technologies for the prevention and treatment of pressure ulcers in different healthcare settings

Mölnlycke® - sponsored satellite symposium at European Wound Management Association 2019 Conference
Wednesday June 5, 15:30 -16:30 CET
Rooms G2-G3, Swedish Exhibition and Congress Centre and Gothia Towers, Gothenburg, Sweden

Learn from the latest research on preventing and treating pressure ulcers

Join us to hear from leading experts about the very latest research on preventing and treating pressure ulcers to improve patient care and save health care time and cost.

Pressure ulcers are a needless cause of suffering for patients and a drain on health care resources. In this symposium, leading international experts will present the results of their research into technologies that can prevent and treat pressure ulcers, including:

- Australian research into the clinical and cost-effectiveness of multi-layered foam dressings and an innovative turning and positioning system in the prevention of pressure ulcers
- A European randomised controlled trial of multi-layered foam dressings for the prevention of pressure ulcers in intensive care settings
- Pre-clinical research and clinical experiences of advanced dressings for the treatment of pressure ulcers

Hear from leading international experts

The symposium will hear from leading research experts from around the world, including:

- ✓ Joyce Black, PhD RN FAAN, Associate Professor of Nursing, University of Nebraska Medical Centre, Omaha, USA
- ✓ Nick Santamaria, RN PhD, Professor of Nursing Research, Translational Research at The University of Melbourne and The Royal Melbourne Hospital, Australia
- ✓ Jan Kottner, PhD, Scientific Director Clinical Research, Clinical Research Center for Hair and Skin Science, Department of Dermatology and Allergy, Charité-Universitätsmedizin, Berlin, Germany
- ✓ Amit Gefen, PhD MSc BSc, Professor of Biomedical Engineering, Tel Aviv University, Tel Aviv, Israel
- ✓ Paulo Alves, PhD RN MSc, Assistant Professor of Nursing and Tissue Viability, Catholic University of Portugal, Porto, Portugal
